SUMMARY

I'm a third-year Computer Engineering student at Vishwakarma University, into ML, AI agents, and shipping full-stack products. Most of my real experience lives in open source: 42 merged pull requests across Gumroad, Dodo Payments, DigitalOcean, and Ghostfolio. Honestly, I'd rather be judged by my GitHub or portfolio than a resume screen, but here's the short version.

EXPERIENCE

Project Intern, Dodo Payments¹

Global Merchant of Record for SaaS and AI businesses; backed by Antler, 9 Unicorns, and Venture Catalyst (\$1.1M pre-seed).

- Shipped 20 merged pull requests across the billing SDK, payment-migration tooling, and the community Discord bot.
- Built an auto-discovery system for playground components, added Stripe support to the Fastify template, and implemented Stripe and Lemon Squeezy migration paths (providers, coupons, product types).

Software Intern, Vardhan Software Solutions (VSS)

- Automated documentation workflows, reducing manual effort across the team.
- Built a Python-based video processing pipeline for scalable, automated chapter generation.

OPEN SOURCE

- **Gumroad (Antiwork)**² (highest achievement): shipped contributions across both the Gumroad web app and mobile app, earning \$10,000 in three months across 19 merged pull requests covering payment-flow fixes, Stripe and SendGrid integrations, and native mobile navigation.
- **DigitalOcean, Ghostfolio & different-ai**: merged PRs spanning an SDK polling helper for knowledge bases, assistant search-result UX, and CLI logging for managed services.

PROJECTS

[Entitlements System, Dodo Payments](#)

- Fulfillment system that converts payments and active subscriptions into automatic access grants across License Keys, Discord, GitHub, Notion, and digital-file integrations, handling the full grant lifecycle off webhooks with idempotent issuance and automatic revocation on cancellation or refund.

[NetPulse Monitor](#)

- Decentralized uptime monitor where independent validators verify checks and are paid via micropayments.

[VM Rentals](#)

- Marketplace to spin up, manage, and bill virtual machines on demand.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, TypeScript, Rust, Go, Ruby

Frontend: HTML5, CSS3, Bootstrap, React, Tailwind CSS, Next.js

Backend & Databases: Node.js, Express.js, MongoDB, MySQL, PostgreSQL, Prisma

AI & Machine Learning: TensorFlow, PyTorch, OpenCV, scikit-learn, Transformers

DevOps & Tools: Linux, Git, Docker, Firebase, AWS, Vercel

Specialized: Arduino, IoT programming, Discord.js, Discord.py

EDUCATION

B.Tech Computer Engineering, Vishwakarma University, Pune

SGPA 9.1 | CGPA 8.3

¹Dodo Payments company profile, [Tracxn](#).

²Merged pull requests, github.com/antiwork/gumroad.
